I had the privilege of going to lunch with my coworker, Sid. He shared his story about his tenacity in developing the Nicoderm patch. I commended him on how many lives he probably extended. He hubly said, "Hmm, I never thought of it that way. What a gentleman and a scholar" I look forward to seeing him again..

Sid was a great mentor to me as i was learning the pharmaceutical industry but what I remember most are the wonderful stories he would tell of his safaris' and other incredible trips. I am a better person for knowing him and having the chance to be around such a great person as Sid.

I will never forget what happened after I had my first conversation with Sid over 15 years ago. I told Sid (my coworker and friend) my son was attending University of Cincinnati to become a pharmacist. Couple weeks later my son asked me if I knew Sid Goldstein because someone named Sid Goldstein had just donated money toward his tuition. We will always be grateful for his kindness and generosity.
